WORK EXPERIENCE

System Developer – YouCode Technologies Corp

Feb 2024 – Mar 2026

- Developed and maintained high-performance web applications using **Vue.js** and **Next.js**, optimizing frontend interfaces and full-stack features to enhance client experience.
- Engineered and integrated **RESTful APIs** using **Laravel**, streamlining data communication between frontend interfaces and backend services to improve system modularity
- Standardized local development environments with **Laragon** and eliminating environment-related deployment inconsistencies.
- **Collaborated** with UI/UX designers in **Figma** to translate prototypes into pixel-perfect, responsive frontend components.
- Managed **version control** and team collaboration using **GitHub**, implementing branching strategies and code review workflows to streamline feature delivery and maintain high code quality.
- Utilized the **MERN** stack (**MongoDB**, **Express.js**, **React.js**, and **Node.js**) to develop and maintain responsive full-stack web applications and RESTful APIs.
- Built dynamic frontend interfaces with **React** and integrated backend services and database operations using **Node.js**, **Express**, and **MongoDB**
- Utilized **Drupal 10.5** for website content management, module configuration and frontend customization for our client needs.
- Used **Composer** and **Drush** to manage Drupal dependencies, install/update modules, clear cache, and streamline development and maintenance workflows.

Full Stack Developer – Sharks Billiard Association

Jan 2023 – Jan 2024

- Designed and developed user interface of stat collector web application using **React** and **Tailwind CSS** while ensuring simplicity and user friendliness of each module

EDUCATION

AMA Computer University – Sta. Cruz Laguna Branch

Jan 2017 - Dec 2020

Bachelor of Science in Information Technology

SKILLS

Frontend Development using Drupal, Vue.js, Next.js, React.js, Styling with Tailwind CSS

Database management using MySQL Workbench, and Version control using GitHub

Backend and RESTful APIs using Node.js, Express.js, Laravel, and PHP

PROJECT EXPERIENCE

Frontend Developer for E-Library

- Managed responsive frontend development in Drupal 10.5 by implementing custom themes and modular components to improve accessibility and content management efficiency.

Fullstack Developer for Robotics E-Commerce Management Platform

- Developed using React, Javascript, Tailwind CSS, Express and Node.js with Shopify integration for managing robotics products, inventory, orders, and responsive user experiences

Frontend Developer for School Management Information System (SMIS)

- Implemented responsive UI components and managed application routing using React Router, ensuring seamless navigation and protected route authentication for enhanced security and user experience.

Frontend Developer for Event Management System (EMS)

- Developed responsive frontend interfaces using Vue.js and integrated Laravel/PHP backend functionalities to deliver secure, scalable, and seamless user experiences.

Frontend Developer for Stat Collector Web App

- Engineered a responsive user interface using React and Tailwind CSS, implementing dynamic navigation with React Router to ensure a seamless and intuitive user experience.
